

Speaker of Session MECHANICS OF COMPOSITE MATERIALS

I am Subhan Ahmad, born in Aligarh, a city in India. I did B.E (Civil Engineering) from Aligarh Muslim University in 2011 and secured 85.33% marks. After B.E I worked as a site engineer in Jamran Construction Co. in Qatar and joined M.Tech (Structural engineering) in Aligarh Muslim University in 2013 and secured 85.85% marks. Topic of my M.Tech thesis was “*Influence of glass and polyvinyl alcohol on fresh and hardened properties of self-compacting concrete*”. I have published four papers from M.Tech thesis in International refereed journals. From July 2015 till date I am a research scholar in Department of Civil Engineering in Indian Institute of Technology, Roorkee. My research interest is fibre-reinforced self-

compacting concrete and behavior of structural elements subjected to fire.
